

Parent/Guardian Pledge for 2021-2022

MISSION: The Widener Partnership Charter School (WPCS) is committed to educating the whole child through attention to intellectual, emotional, social, and physical development. As part of this comprehensive approach to education, the WPCS will incorporate writing, technology, art, music, and foreign language as fundamentally important to the child's development of basic skill in reading, math, and emotional competence and to the child's overall development as a broadly educated person.

PARENT/GUARDIAN PLEDGE

As the parent/guardian of a student or prospective student of the Widener Partnership Charter School (WPCS), I hereby pledge to:

- Support the elements of the WPCS mission and policies, which are detailed in the Family Handbook, by partnering with the WPCS in the education of my child. I understand that my child will actively participate in academic arts and health programs, which may include: music, foreign languages, visual art, physical education and health.
- Submit all documentation required for my child's enrollment and continuation at WPCS in a timely manner.
- Ensure that my child attends school daily, arrives on time, and adheres to the school's code of conduct. I understand that attendance significantly impacts grades.
- Review carefully the school's code of conduct and discipline code.
- Provide up-to-date telephone contact where I or a designated back-up contact person can be reached throughout the school day.
- Make sure that my child comes to school in uniform dress each day.
- Be actively involved in my child's academic achievement, which includes monitoring homework and grades, attending all parent-teacher conferences (including Back-to-School Night), and maintaining strong communication with my child's teacher(s).
- Support my child by attending the school functions in which my child is involved (e.g., plays, concerts, Back-to-School Night, Family Day, etc.) as my work schedule allows.

Provide for my child a healthy lifestyle, including attention to personal hygiene, good nutritional habits, age-appropriate sleep habits, a drug-free environment, regular physical exercise, and routine physical screenings.
